A forged tool - Material: SCM 440.  
We include two different adaptors so that you can choose the appropriate adaptor for your repair.

## Exclusive All Euro Preorder AST5188

Auxiliary Belt Tensioner Tool Set - 1.4 / 1.5 / 1.6 / 2.0 Diesel Engines FORD - PSA

**Please Note: This Tool is exclusively available as a preorder  
- estimated delivery 3 weeks.**

The Auxiliary Belt Tensioner Set has been developed to provide a safe and controlled method of adjusting the belt tensioner position during removal and installation of the auxiliary belt.

Belt tension is provided by a heavy spring built in to the tensioner unit, the tensioner features a raised peg as a location to apply leverage when removing or installing the auxiliary belt. Without the use of special tooling, belt removal or installation requires two people.

Access to the tensioner can be severely limited by engine and vehicle body components. AST5188 has been designed to provide easy access to the tensioner peg in all instances. The set includes a number of adaptors and an extension bar featuring two bi-hexagonal drives, providing a number of options when assembling the tool to access the tensioner.

AST5188 can be used with AST4765 Auxiliary Belt Tensioner Tool Set for even greater application coverage.

Also used on 2.0 / 2.2 DW10 and DW12 engines.

### Applications:

**Citroën 1.4 / 1.6 HDi 8v. / 16v. C1 / C2 - C3 III, C3 Pluriel, C4 Picasso**
