### BMW Engine Support Bar

. The main body is a 1400 mm long square tube with two removable supporting stands which can be set on the threaded hole bases of the shock absorber upper base for better, steady engine holding. There are universal joints on both supporting stands which give the ability to adjust the support bar in any direction.

. The adjustable 720mm long square tube offer a third support to avoid the engine toppling down. It is a special design that is safe and convenient. There is a joint added between the two square tubes which allows the 720mm long square tube to be turned clockwise or counter clockwise.

. One hanging ring and locking ring are included which can be screwed onto the engine directly to hold the engine. One forging hook and chain make it easy to hang on all kinds of engines.

. There is also a pair of secondary stands which can be set on the threaded holes of the linking bars in the engine bay.

Special Pre-Order Offer!!

. Application: All BMW models
