

An Exclusive Preorder From Endeavour Tools ULTRACAP BATTERYLESS JUMPSTARTERS

Finally technology has moved ahead with this revolutionary new line of portable jumpstarters - never be left waiting for the unit to charge again,! These units charge in just three minutes and can even charge from a depleted battery as they only need 5v to charge!

NO INTERNAL BATTERY

Innovative, next generation capacitor technology. Intrinsically safe, ideal for extreme conditions.

QUICK CHARGING

Can be fully energised in less than 3 minutes. No more delays waiting for battery to charge. Ideal for car yards, workshops etc.

NO EXTERNAL POWER SOURCE NEEDED!

Can use the residual energy in a depleted battery to energise the jumpstarter. (requires 5V+ residual charge)

FLEXIBLE CHARGING

If the vehicle battery has insufficient residual charge, these units can easily charge from another vehicle battery, USB cable or power tool battery. (12V)
