Defender America's Cup 36

Interview with Tom Waterhouse, Commercial Manager, Emirates Team New Zealand, 3 times winners of the America's Cup.

What made you want to work with Teng Tools in the first place?

Emirates Team New Zealand were looking for a trustworthy and reliable hand tool partner for its 36th America's Cup defence campaign. The team did some research and easily determined that Teng Tools was the best hand tool partner to work with. The team operates in a technologically focused and innovative environment where high pressure situations demand the best; Teng Tools deliver over and above.

How has using the Teng Tools 'Get Organised' system benefited the team?

Having access to a range of quality tools and storage units across the team base allows the team to be more effective with the repair and maintenance of the race yachts, the team base, and the fleet of chase boats. The storage solutions come in a range of sizes with both fixed and mobile units that allow the team to work with ease and have tools on hand whatever the task.

What are the most essential tools in your kit that you cannot live without?

Most essential tools would be your traditional screwdrivers and 1/4, 3/8 and 1/2 inch drive socket sets, as long as you have these tool combinations by your side you can usually repair most mechanical issues that arise.

Has the Coronavirus Lockdown affected your preparations in anyway?

The level 4 lockdown in NZ meant that the team had to stop construction of its race yacht but with NZ out of full lockdown after only 4 weeks the team has now made up for the lost time and are again on track with the defence campaign timelines.

What are your expectations / targets for the Americas Cup 2021?

The team's target is to successfully defend the 36th America's Cup in Auckland, New Zealand.

Teng Tools "Hip Grip" feature means the contact surface grips on the flat surfaces of the nut or bolt rather than on the corner. This helps to prevent damage and makes it possible to grip nuts and bolts which already have damaged corners.

Teng Tools is proud to be an Official Supplier for Emirates Team New Zealand in defending the America's Cup in 2021. Emirates Team New Zealand have chosen Teng Tools to fit out their base with one of the most systematic tool storage modular systems on the planet.

The F1 "Pit Lane" Concept

You want the manufacturing process to flow like it should. To get that, you need a perfectly tuned workstation. The solution for Emirates Team New Zealand was industrial quality workshop units designed to integrate into the Teng Tools Concept of "Get Organised".

Total of 27 tool kits, over 6000 pieces of tools/accessories & over 17 meters of racking systems Teng Tools provided a "Pit Lane" concept of custom designed workstations and kits for each department including Engineering, Boat Building, Electronics, Hydraulics, Rigging Workshop, On Water Operations, Chase Boats and more.

Developed as a modular system allowing you to build the ultimate workshop that can adapt to your everyday needs. Manufactured with heavy gauge steel, these units are built to last.

For some, things organised perfectly might seem boring, but when it comes to get things to run like clockwork, it's vital.

Welcome to our world Emirates Team New Zealand!

MAXI-CUT METRIC CUTTERS

Tungsten Carbide Tipped Annular Cutters

As well as providing excellent life in mild steel, Tungsten Carbide Tipped Cutters are suitable for drilling difficult materials eg. stainless steel, Bissalloy and wear plate.

These Tungsten Carbide Tipped cutters consist of an alloy metal body, and tungsten carbide cutting teeth. Due to this composition, these cutters are less susceptible to breakage than standard high speed steel cutters, especially in larger diameters and longer lengths.

The tungsten carbide cutting teeth can also be sharpened and replaced.

Large range available in sizes 12-150mm dimeters and lengths up to 150mm.
